— History & Tradition of Ome —

Ome was formerly home to a bustling community of almost 800 weavers and fabric dyers. During the Edo period, the city actively turned out heaps of indigo dyed goods, the color of which was most-beloved by the Japanese and soon to become a symbol of Japanese tradition and spirit; the city is also home to Ome-jima stripes, a type of woven fabric which boomed in popularity among urbane Edoites. Ome, a town that developed fabrics, sake, temples, shrines, arts and food culture amidst plentiful nature. Just like the indigo fabrics which grow deeper and darker with each dyeing, a tale of" Ome Blue" is woven here from culture, history, and tradition.
